

Sophisticated

SOPHISTICATED

High quality materials combined with smart construction lead to sophisticated system solutions for efficient and economic operation. Rubber gasket with the help of pneumatic pressure

Autoclave PLC system architecture

- 21 CFR Compliance HMI
- 82 Column Character dot matrix printer
- Ethernet Protocol Communication
- Different type of Recipe in HMI
- Vacuum Leak Test, Bowie Dick Test, HPHV Standard Cycle incorporated in HMI
- SCADA Compliance

CSSD Design

The design of a central sterile supply department requires many considerations proper Design of areas within the Department choosing the right equipment and understanding the needs.
